The GT Stage Deck is a portable stage system suitable for all outdoor and indoor applications.

With its incredibly adaptable and lightweight design, GT Stage Decks can be used for concerts, theatres, school and community halls, trade fairs, fashion events and every other event.

The aluminum profile offers enormous flexibility and compatibility with other leading brands.

Additional accessories, such as Deck Levellers, can be connected to the platform using the notch to bring all platforms to a even level.

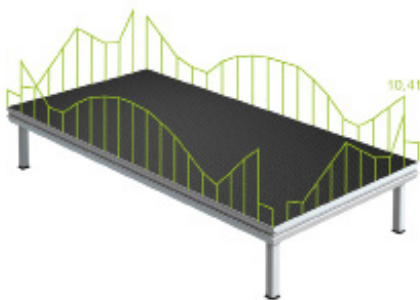

The reception for the legs is specially designed for round and square legs and with a size up to 60x60 mm. The optionally available platform clamp ensures a stable connection with each other.

- ▶ **Made in Europe**
- ▶ **Maximum load capacity: 750kg/m²**
- ▶ **TÜV approved**

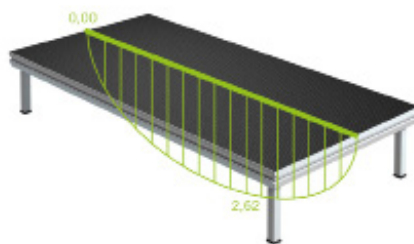

TÜV Nord Certified

This Global Truss product is fully certified by TÜV Nord and exceeds the applicable standards.

STRENGTH

Loading according **DIN 15921**
 Vertical: $q=750\text{kg}/\text{m}^2$

COMPATIBLE PROFILE | STAGE PROFILE

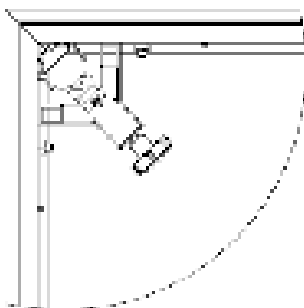

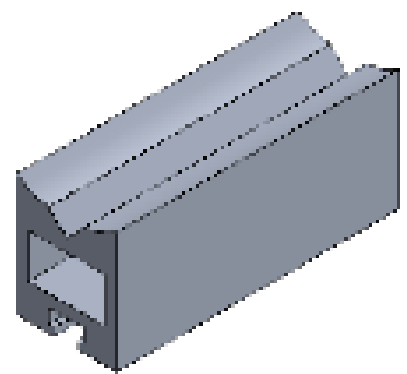

- ▶ **Compatible** - offering full flexibility with other leading brands
- ▶ **Improved shape** - no special adaptors required
- ▶ **Low storage costs** - 90mm stage height for easy storage

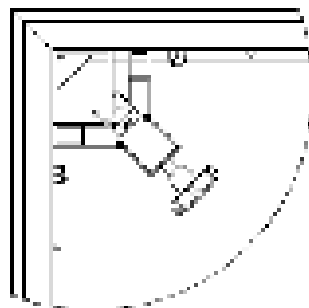

UNIVERSAL PLATFORM LEGS | PROFILE

Most stage systems on the market use round legs with a diameter of 48.3mmØ or alternatively can use square legs with a dimension of 50 x 50 mm or 60 x 60 mm.

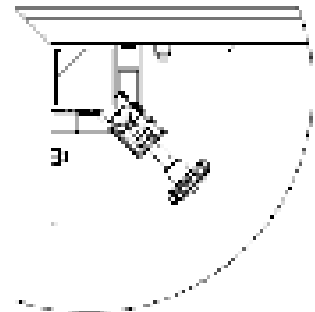

The pressure cube of the GT Stage Deck system is designed to accommodate for all leg fittings and can easily lock and be secured into place with a simple twist of the bolt for maximum stability - no tools required!

48.3 mm

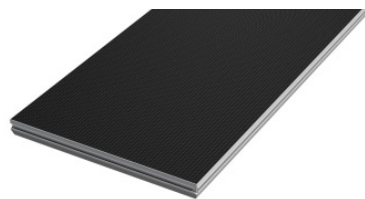

50 x 50 mm

60 x 60 mm
