

The traditional 'Meat Rack' is a great way to store a significant number of lights in one mobile, compact storage trolley with capacity for 20 profiles, 20 moving heads, 32 LED pars or a combination of different light fittings, it provides a very efficient solution for storing and moving lights from room to room in a venue, around a warehouse or even in and out a vehicle for transportation.

### Features and Benefits

- Heavy duty steel RHS and tube construction with durable black powder coat finish
- Heavy duty castors suitable for hard or carpeted floors
- Space efficient 1.8m x 0.75m footprint
- Ease of access to lights eliminates the need to lift lights up and over thus reducing risk of back strain
- Clear access enables the opportunity for faster and more convenient interaction with the light fittings whether it be servicing, testing or assigning the units
- More efficient movement of multiple fittings around a venue or location compared to multiple road cases
- Offers considerable savings compared to other storage options such as road cases when permanently used for storage

## TECHNICAL SPECIFICATIONS

Frame Material	40x40mm Steel Welded RHS
Tube Material	AL3003 Grade
Tube Dimension	50mmØ x Xmm
Castor capacity	100mmØ 1000kg/set

## PRODUCT CODE

**GT A-MRTROL** Lighting Fixtures Meat Rack Trolley 1.8mL x 0.75m x 1.9mH
