

Modular Access Ramp

The Global Truss **Modular Access Ramp** is a regulation-compliant, modular and portable accessibility solution. Designed to support people with disability, wheelchair users, and those with vision impairment, this ramp system ensures safe and dignified access to stages, buildings, and elevated areas.

Meeting Australian Standards, the modular design adapts to landing multiple heights, making it suitable for both temporary and permanent installations. Built with durable staging platforms, the ramp provides a 1:14 incline, ensuring safe and inclusive access for all. With quick installation, it's perfect for festivals, venues, award presentations and temporary or permanent installations, allowing for effective accessibility improvements.

- **Round Handrail** – 50mm diameter.
- **Exit and Entry curved handrail** extends 300mm beyond ramp and alerts patron of start and finish of ramp.
- **Tactile Ground Surface Indicators** – TGSIs at entry and exit points.
- **Continuous Handrail** – Full-length support with 270° post clearance.
- **Property Accessible Ramp** – 1000mm wide, 1:14 gradient.
- **Extended Landing** – 1800mm long x 2400mm wide. Flowing and generous turning circle.
- **Kick Panel** – Mounted outside to maintain 1000mm clearance.
- **Modular Design** – Left & right configurations, 300mm, 450mm, 600mm, 750mm and 900mm heights. *Custom heights available to order (limitations apply)
- **Broad Compatibility** – Works with any standard stage deck.
- **Complete Kit** – for multiple configurations and heights.

Designed for flexibility, the Global Truss Modular Access Ramp supports left-turn, right-turn and wraparound configurations with mid-height landing platforms where applicable. Its modular nature makes it an ideal accessibility solution, ensuring everyone can participate in events, performances, presentations and ceremonies.
