

# Cable Charmer Cable Management

## SNAKE CABLE GUIDE

The Cable Charmer Guide Kit is designed to keep power and signal cables neatly organised when raising or lowering truss with chain hoists. With drop lengths from 3m to 12m and base options from 2m to 4m, it provides flexibility for a wide range of rigging heights and setups. Finished in black for a discreet appearance, it reduces strain, prevents tangling, and ensures cables remain safe, controlled, and out of the way in production environments.

Built for long-term performance, the Cable Charmer features pivoting hinges that guide cables gently while maintaining a safe bend radius, along with bronze bearings for smooth, durable operation. Its interlinking one-metre sections allow almost any base configuration, while the innovative hinge system minimises back-and-forth truss movement during hoisting.

Base Width	Available Drop Heights
2 metre	Available in 3m, 5m, 7m Heights
3 metre	Available in 5m, 6m, 7m, 8m 9m, 10m, 11m, 12m Heights
4 metre	Available in 12m Heights
Available in Black. Silver colour special order only.	

Compatible with F01 Tube, F32, F33, and F34 truss, the Cable Charmer delivers reliable, professional cable management for both touring and fixed productions.
